Camden, N.J., February 16, 2026

Subaru of America, Inc. today announced the Subaru Crosstrek was named The Most Dependable Small SUV in America in the JD Power 2026 U.S. Vehicle Dependability Study. The award comes on the heels of the bestselling SUV's JD Power 2026 U.S. Residual Value Award in the Small SUV segment for the third consecutive year.

The U.S. Vehicle Dependability Study, now in its 37th year, examines more than 180 specific problem areas across nine major vehicle categories, including driver-assist technology, interior and user experience, powertrain, driving experience, and vehicle exterior and interior.

“Earning the title of The Most Dependable Small SUV in America from JD Power is a tremendous honor,” said Jeff Walters, President and COO of Subaru of America, Inc. “Dependability is at the heart of what our customers expect from Subaru. This recognition, alongside our continued commitment to affordability, reflects our dedication to delivering quality, capability, and long-term value to our owners.”

The 2026 Subaru Crosstrek is available in Base, Premium, Sport, Sport Hybrid, Limited, Limited Hybrid, and Wilderness trim levels. According to Experian, 97% of Subaru Crosstrek vehicles sold in the last 10 years are still on the road today.

New for 2026, the Subaru Crosstrek Hybrid is equipped with an Atkinson/Miller-cycle 2.5-liter SUBARU BOXER® engine paired to electric motors and a high-capacity lithium-ion battery making 194 horsepower combined.

All trim levels of the 2026 Subaru Crosstrek are equipped with Subaru Symmetrical All-Wheel Drive, X-MODE® Dual Mode System with Hill Descent Control, and at least 8.7 inches of ground clearance. Standard on all trim levels is a Lineartronic® CVT (Continuously Variable Transmission) with smooth and quiet performance.
